Gary –

Wanted to go ahead and forward these tables to you. We had Mark put these together. The first tab includes industrial and residential screening levels for both the EPA RSLs and LA RECAP.

Highlighting is applied based on the system denoted below the table. The other four tabs highlight based on a single screening level. I've also included the final Sample Location Map for reference. The table do not include data from the EPA lab. We have not received the EDD deliverable which is upload into SCRIBE. Should be receiving it soon. We should probably schedule a conference call to discuss the next steps. We can start putting together volume estimates, but will need to decide on what action level to use.

The due date for the TDD is 11/01 so it looks like we will need to amend the TDD due date. The interim is technically due on 10/01, so the sooner that could be done the better. If you just want to review the existing data, compile volume and cost estimates for solidification and produce a final report, I would estimate a TDD completion date of 12/01. If we decide to run some treatability tests then additional time would be needed. Just wanted to remind you that Weston has to contact (email) the EPA Contract Officer when requesting/discussing TDD budgets and amendments.

Thanks,

Jeff Wright, CHMM
